

NSGDatacom

Construction

Cellular Office in a Box

Voice, FAX, Data Solutions

The Problem: Construction trailers can not get telephone lines or data transport in a timely manner.

The Solution: NSGDatacom 2205A – 2, 4 and 8 port units providing Voice, FAX and video surveillance, installs in minutes.

The NSGDatacom provides the perfect solution for trailers that can not get traditional copper lines, but require Voice, FAX and Data. Markets include: temporary banks, construction trailers, real estate offices at new home sites, etc. The 2205A series supports both Group 3 FAX and Voice calls with bandwidth left over for internet data. The units are portable/mobile so when a trailer must be moved communications are not interrupted, or charges incurred.

DIDs, local telephone numbers are available or phones can be programmed to perform as Off Premise Extensions (OPX).

Typical install times are in minutes. Units can be set on a shelf or moved from one location to another or left in place for years. Consider the solution:

- Does not require circuit switched data which is scheduled to be discontinued.
- Requires one Cellular account for up to 24 Voice and or FAX calls.
- Installs in minutes via industry standard connections, e.g., RJ11
- Transports data at the same time as a call(s) allowing you to access the web and speak
- Is available in 2, 4, 8 port analog and a T1 (24) and in 12, 24, 48 VDC and 120/220 VAC
- Transports 40,000 telephone minutes per month in less than 4.8 GB (less than the 5GB requirement. Compatible with 3G and 4G.

Compatible with the Cellular technology of your choice
