

Product Enhancements

MFS-4M Electro-Mechanical Multi-Functional Switch Module

This product has all the same functionality as the MPS-4M series, with the exception that it does not have patching capability.

MFS-5M Electro-Mechanical Multi-Functional Switch Module

This product has all the same functionality as the MPS-5M series, with the exception that it does not have patching capability.

MFS-6M Electro-Mechanical Multi-Functional Switch Module

This product has all the same functionality as the MPS-6M series, with the exception that it does not have patching capability.

155-AC-64 & 165-AC-64 Remote Controller

A rack mountable standalone remote control unit with two digital input ports, controlling up to 64 external Dynaswitch® rack adapters with a MRA-10 slave control module in position 17. The unit includes one terminating plug, and an auto ranging 85-240 VAC power supply which replaced the old factory-set voltage power supply.
