RE: NSG Datacom Wi-Modem G3000 Open Development Certification

Dear Emerson Deitz:

Congratulations! On the behalf of Janet Schijns and the Verizon Wireless Open Development team, we are pleased that you are participating in the Open Development Initiative. The NSG Datacom Wi-Modem G3000, under software version 1.10.0.VT.U and hardware version 11006300 rev.B has been approved through the Open Development certification process.

Open Development is centered on driving innovation and providing customers with flexibility in wireless solutions. Most importantly, Open Development is designed to encourage the development community to create new products and services in addition to what Verizon Wireless currently offers. NSG Datacom will now be able to market the Wi-Modem G3000 to operate on the nation's most reliable wireless data network. Our customers in turn are now able to utilize these devices to support their business needs.

Thank you for choosing to have your devices certified via the Verizon Wireless' Open Development program.

Sincerely,

A handwritten signature in black ink, appearing to be "ES", with a long, sweeping horizontal line extending to the right.

Eric Sorensen
Executive Director, VES
Verizon Wireless
