Mr. William Grant  
Vice President Sales  
NSGDatacom, Inc.  
Suite 100  
3863 Centerview Drive  
Chantilly, VA 20151

Dear Mr Grant,

We are pleased to advise you that over the past 5 years the NSGDatacom Nx2200 Network Exchange has been deployed and operated reliably by the Air Traffic Management Bureau (ATMB) of the Civil Aviation Authority of China (CAAC).

The Nx2200s provide mission critical communications services between over 60 regional control centers and airports including Hong Kong SAR, Guangzhou and ShenZhen, some of the busiest airports in the region. Your products provide the ATMB the ability to provide cost effective real time radar, telemetry, hot-line voice and other essential data communications on shared network links with automated satellite backup. They provide critical real time air traffic control information between sites during peak periods and also allow smaller sites to be managed from regional control centers during periods of low activity.

FIT would like to extend its sincere thanks and appreciation for the excellent product and service provided by NSGDatacom. In our experience the Nx2200 is unique in its ability to provide dependable integrated services of this type on a single platform. The Nx2200 continues to be a critical component of the ATMB network and will be for the foreseeable future.

Sincerely,

Peter Lau  
Director,
